Most graphically impressive South Sudan has ever seen. Really good game.. Day Of Defeat. Not bad for a project that started out in a college dorm. Had massive fun playing this game back in my youth. The sound of bullets whizzing past your ear or slamming into some nearby surface was disturbingly realistic. Getting into a game was incredibly easy, and the action draws you in like a real war movie. Once you went online, the adrenaline rush is unsurpassed. The sense of satisfaction you felt in taking a crucial victory location or taking out four enemies in a row simply couldn't be beat. This game started the World War online FPS genre. Valve is horrible at making new games which is a shame. They were ahead of the curve and lost because they refused to produce any new games under the Day of Defeat franchise.. I can't move my mouse, Camera is stuck itself, It freeze during the game, Well i had to say, Good game.
